**InTouch Email Updates**  
Every Week

## Phase 4 Scheduled to Begin August 13

Work in phase 4 is scheduled to begin **Monday, August 13**, and will last for about 4 weeks. Please refer to page two for the phasing location map. Only Eagle Trace Lane will be under construction along with the adjacent sidewalk and pedestrian ramps.

## Spot Utility Rehabilitation

The contractor will be completing spot utility work **August 14**. This work typically consists of excavation within the roadway. All excavations started will be filled by 7 p.m. the same day.

## Concrete Removals

Curb removal and replacement is anticipated to begin **August 13** and last approximately 1 week. White arrows have been painted on the curb to show areas for replacement. If a curb section is sunken, heaved, or has large chunks of concrete missing from the gutter line, it typically meets the criteria for removal. Curb that is cracked, but still functional, will not be removed.

## Curb Installation

Please note that new curb cannot be driven over for approximately 5 days following placement. The contractor will not warranty concrete that has been driven on before it has cured.

Curb placement is anticipated to begin **August 20** and last approximately 3 days. Please do not step or walk on the new curb for **24 hours** after the curb has been poured.

## Street Surface Removal and Paving

The asphalt street surface removal and paving process will take place from **August 27 – September 7**. Street surface removal will occur first, leaving a gravel driving surface. The contractor will then pave the first layer of new pavement within 5 days of removing the existing pavement. A second and final layer of pavement will be placed approximately 1 week after the first layer. Preparatory work will include raising existing manhole covers within the roadway prior to paving the second layer.

## Irrigation Systems, Invisible Fence, & Landscaping

Private features (irrigation lines and heads, underground dog fences, landscaping, etc.) within the City owned Right of Way may be damaged from the construction related activities. White arrows along the curb provide approximate locations of curb replacement.

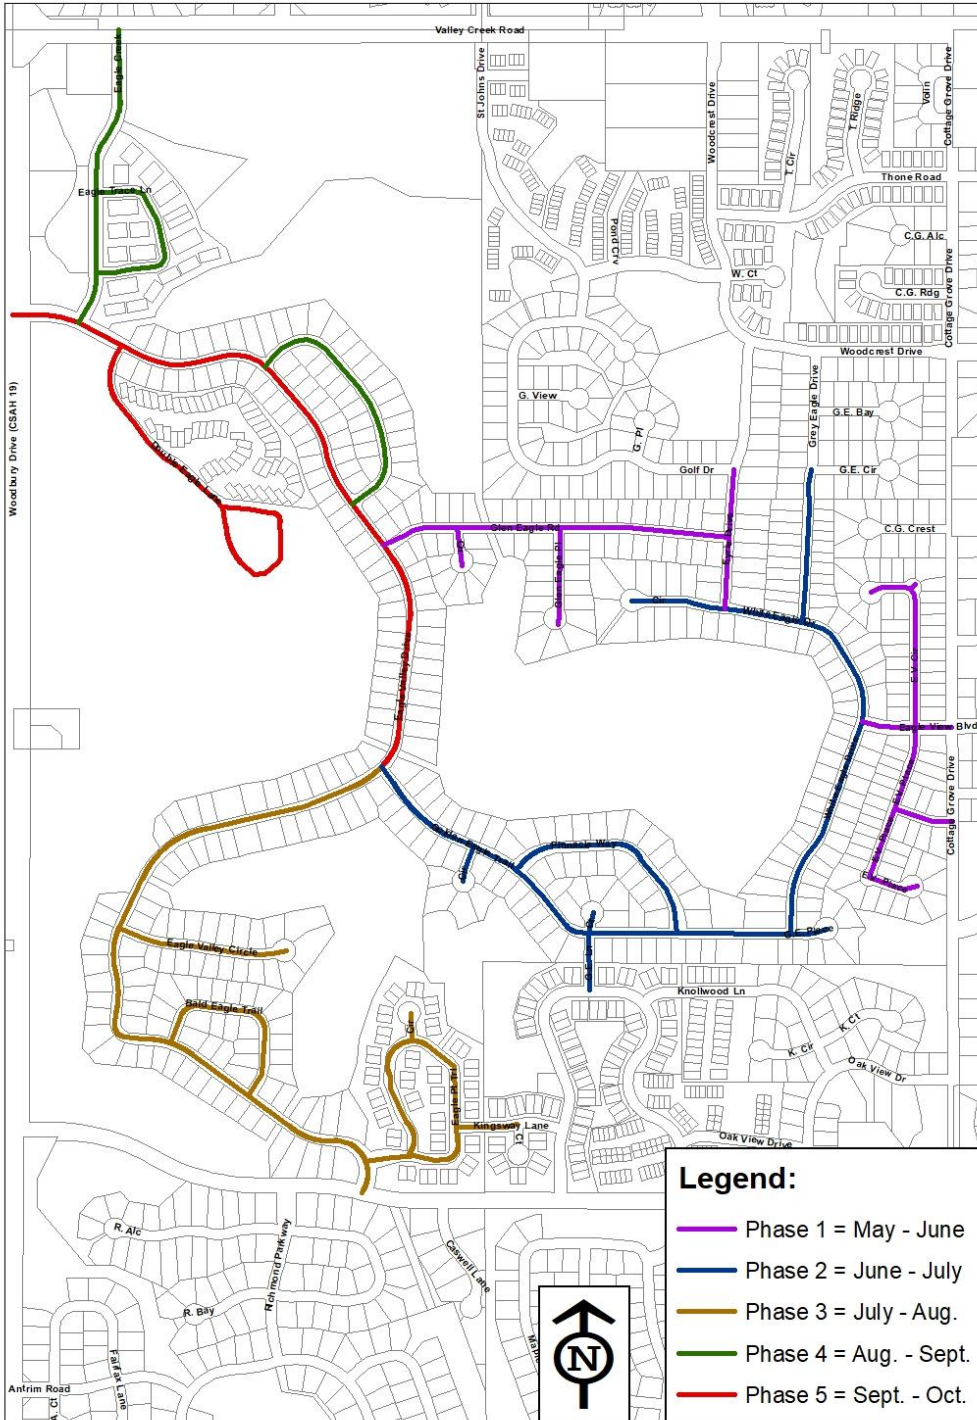

No guarantee can be made regarding the contractor avoiding damage to these features. ***Any damage to private features in the right of way will not be repaired, replaced, or altered by the city or the contractor.***

Private features may be reinstalled once the curb is installed and before restoration occurs. There will be a two-week window to install these features. Please place a flag by the reinstalled features so the contractor can work around them.

If you have any questions regarding the potential disturbance to your yard, please contact the project hotline to meet with field staff.

Eagle Valley Area - Phasing Map  
Revised 6-13-2018**

**Parking**

Please do not park on Eagle Trace Lane areas marked with white paint during construction beginning at 7 a.m. until all work is done for the day. If the curb in front of your driveway is not marked for removal, please park on your driveway at all times.

If curb is marked in front of your driveway for removal, you will lose access to your driveway when the curb is removed and replaced, and you may also have a portion of your driveway patched following the curb replacement. Replaced asphalt driveways can be driven over 30 minutes following asphalt placement. Please park on the street in front of your house if your driveway is affected until the contractor reopens access to your driveway. Please avoid parking in front of other curb sections marked for replacement, or parking on the street during days of pavement removal.

**Stay Informed**

If you have any questions or concerns, please contact the project hotline or project email. Weekly InTouch email blasts will be sent with project updates. You can sign up for InTouch updates by visiting the city's website at [www.woodburymn.gov/](http://www.woodburymn.gov/) and signing up at the top of the page.
