June 12, 2020

Dear Resident:

The 2020 Reclamite Roadway Maintenance Project is scheduled to start between June 25 and July 9. Reclamite is an oil-based pavement rejuvenator material that will be sprayed directly on the road surface, followed by the application of a sand product. It is environmentally safe and has been found to effectively extend the life of newly constructed pavement, which is why it is typically applied the year after a Road Rehabilitation Project.

The highlighted sections of the attached maps illustrate the areas scheduled to receive this treatment. All work schedules are weather dependent. To allow the contractor to do effective and thorough work, **on-street parking will be prohibited from June 25 to July 9, between 7 a.m. and 7 p.m.**

Once the contractor begins work on your street, the process will take a few hours before the road will be fully open. Construction will be conducted on one side of the roadway at a time, leaving access to properties throughout the process. On-street parking may resume after the sand product is swept the day after application.

You can exit your driveway and drive through the work area, but please go slow and stay on the sanded areas as the material can be slippery and may stick to vehicles. Be advised that driving onto a driveway before the contractor is finished sanding may cause the driveway and sidewalk to become temporarily discolored. These materials can be washed off with hot soapy water, WD-40 or a bug and tar remover. The earlier you can clean it up, the better.

**If you have a lawn irrigation system that sprays onto the street pavement, please try to avoid watering between the hours of 6 a.m. and 8 p.m., or adjust the spray pattern to avoid hitting the roadway. Water can reduce the effectiveness of the rejuvenator.** Thank you for your patience throughout the process and we appreciate slow and attentive driving through areas with workers present.

If you have any questions, please contact the City’s Engineering Department at 651-714-3593 or email engineering@woodburymn.gov.

Sincerely,

Mike Hejna
Engineer I
