July 26, 2018

Dear Property Owner:

The City of Woodbury invites you to attend a neighborhood open house to learn about the proposed 2019 Trail Project. The project will extend an asphalt trail along portions of the north and south sides of Lake Road, from Wooddale Drive east to Radio Drive. Preliminary layouts and plans will be available at the open house for your review. Construction of the new trail segments is scheduled for summer 2019.

The purpose of the 2019 Trail Project is to expand the existing trail network coverage and connectivity within the city's multi-use, off-street trail system. The city's comprehensive plan identifies the city's objective to provide multi-use trails on both sides of major roadways. Construction of the proposed trail segments will achieve this objective and enhance the safety, mobility and connectivity for bike and pedestrian users.

The city expects some minor impacts to private property and landscaping during construction of the new trail segments. We also expect the need for temporary and/or permanent construction easements and right-of-way. City staff will be scheduling individual meetings, after the open house, with residents expected to have impacts to their property.

Please contact either Doug Peterson doug.peterson@woodburymn.gov or Mike Adams mike.adams@woodburymn.gov at (651) 714-3593 for further information.

Sincerely,

Mike Adams
Assistant Park and Recreation Director
