

2020 Roadway Rehabilitation Project Week of June 8-13

All schedules are weather permitting.

Phasing map available on following page.

Phase 1

- Restoration work is scheduled to finish on Monday.
- Miscellaneous cleanup and corrective work is scheduled to occur on Monday and Tuesday.
- The final layer of pavement may be paved late in the week, weather permitting. Please have all cars off of the roadway and in driveways during paving. Cars will be able to access the newly paved road about 30 minutes after paving.

Phase 2

- Concrete driveway aprons and miscellaneous concrete work are scheduled to occur on Monday. Access to your driveway will be restored approximately 5 days after your concrete apron is poured. The contractor will remove barricades from your driveway when it becomes available. Please park further to the west on Timberwood Road during this time.
- Crews are scheduled to begin grading and tolerancing the road late in the week in preparation for paving.
- Topsoil placement is scheduled to begin late next week.

Phase 3 and Phase 4

- Miscellaneous concrete patching is scheduled to occur on Monday in areas that were impacted by utility work.

Questions?

Questions can be directed to the project hotline at (612) 430-2805.
